

VINCENT MOHANNA B.Eng., MSc. DESS Fin. CFA Candidate

Full-Stack Developer & AI Engineer | FinTech Specialist

vince.mohanna@gmail.com | 514-402-4134 | www.linkedin.com/in/vincent-mohanna-6813425

Strategic Summary

Versatile Engineer with a Master's in Embedded Systems and over 15 years of experience across different industries notably finance, healthcare and insurance and AI startups. Recently completed an intensive AI Software Engineering program at Le Wagon to pivot into building end-to-end AI-driven applications. Expert in bridging the gap between complex data streams and modern integrations.

Core Technical Stack

- **Languages:** Ruby on Rails, JavaScript (ES6+), Python, SQL, C/C#, VBA, Bash, Shell script
- **Frameworks/Web:** Ruby on Rails, Node.js, React, Vue.js, Stimulus, CSS3 (Sass).
- **AI & Data:** OpenAI API, REST API, Keras, TensorFlow, MATLAB, SAS.
- **Infrastructure:** PostgreSQL, Docker, AWS, Azure, Heroku, Linux (RHEL).
- **Tools:** JIRA, Autosys, Geneos, Splunk.
- **Web and Full-stack:** VS Code, Antigravity, Node.js, React, HTML, CSS, SQL, Github
- **Programming & Frameworks:** Ruby on Rails, JavaScript, Python, PHP, C#, C, VBA.
- **Data Engineering:** SQL, Matlab, SAS, Insurance Data Standards.
- **Cloud & Infrastructure:** MS Azure, AWS, Citrix XenApp, VMWare, Windows Server Admin.
- **Specialized Domains:** AI & Speech Recognition (Medical), FinTech (ITIL), InsurTech.
- **Workflow Automation:** Advanced VBA Macro design (Excel/Outlook), MS Office Suite, Visio.

PROFESSIONAL EXPERIENCE

Morgan Stanley, Montreal, Canada

2024-2025

Application Production Reliability Engineer

- Supporting Prime Brokerage Trade cycle process flow globally over Linux and Windows server farms
- Using SQL and shell scripts to ensure continuity and data quality for consistency
- Using a stack of internal tools for monitoring and reporting for Trade completion and Settlement flows for listed derivatives across the Morgan Stanley platforms
- Managing critical data streams and scheduling with Autosys jobs
- Investigating ongoing production issues with ServiceNow and JIRA tracking tool for software issues

Koios Intelligence, Montreal, Canada

2023-2024

Application Data Engineer

- Using Keras and TensorFlow to train AI models for chat bot applications
- Data engineering and Integrating insurance based data into LLMs
- LLM tuning, querying and evaluation using SAS and Matlab statistics and Machine learning
- Software testing on the front end of Prompting application

BNP Paribas, Montreal, Canada

2021-2023

VP Application Production Support

- Large scale financial software platforms deployed globally over Linux and Windows server farms
- Data driven software monitoring with Geneos and Splunk for critical processes
- Managing critical data streams for real-time applications with ION
- Software automation and scheduling with Autosys
- Provide support and training for traders and developers
- SQL Server scripts and Linux shell scripting
- Sailpoint and ServiceNow used in tiered software and IT service requests
- JIRA tracking tool for ongoing software issues

CSIO, Montreal, Canada **2018 - 2021**

Technical Support Application Engineer,

- Analyze and implement software automation
- Software integration with Node.JS, PHP and VBA programming
- Technology analysis for integration and workflow automation
- Web content management in Drupal, HTML, CSS and PHP
- Ensure high quality technical support of Azure cloud-based software
- Consulting on data standards in XML and AL3 for insurance industry

TD Wealth, Montreal, Canada **2015-2018**

Investment Representative, CSC, CPH, DFOL, CFA candidate

- Provide Brokerage service to TD Wealth Clients
- Fulfill registered plan transactions
- Provide Market information and Investing knowledge

Fiera Capital Corporation, Montreal, Canada **2014**

Financial Analyst in Fund Accounting

- Preparation of financial statements and earnings
- Invoicing and accounts payable for fund management
- Automating internal processes with Excel Macro programming

Crescendo Systems Inc., Laval, Canada **2011-2013**

Application Engineer in Speech Recognition

- Provide expertise in software Speech Recognition
- Software engineering, testing and product verification
- Creating test and verification applications in C#
- Creating statistical applications in VBA and Excel
- SQL Server maintenance and data migration
- Python programming for natural language processing(NLP)

Anticyclone, Marseille, France **2009-2011**

Application Engineer and Technical Support

- Provide expertise in software Speech Recognition
- Software engineering, testing, documentation and troubleshooting
- SQL Server maintenance of production sites
- Provide end-user training for medical staff
- Product demonstrations at industry trade shows in France

Nuance Communications, Vienna, Austria **2006-2009**

Professional Services Engineer

- Provide technical expertise and support to partner companies implementing Speech Enabled software solutions
- Build and maintain customer relations with software developers
- Software testing, debugging, and bug tracking
- Demonstrate speech recognition technology products at industry trade shows across Europe
- Product training for partner companies and hospital IT staff

Philips Semiconductors, Philips Research Laboratories, Eindhoven, Netherlands **2005-2006**

Master Student in R&D Internship

Completed a Master's research project on application parallelization and real-time systems for a Heterogeneous multiprocessor radio chip intended for the automobile industry as part of a research group focusing on predictable multiprocessors within the Embedded Systems Architecture on Silicon group.

EDUCATION & CERTIFICATIONS

AI & Software Engineering (Bootcamp) | Le Wagon Berlin, Germany | 2026

Graduate Diploma in Applied Finance | McGill University, Montreal | 2015

M.Sc. System-on-Chip Embedded Design | Lund University, Sweden | 2006

B.Eng. Electrical Engineering | Ryerson University, Toronto | 2003

High School Diploma | Neuchâtel Junior College, Neuchâtel, Switzerland | 1998

LANGUAGES

100% bilingual in French and English; Intermediate level: German, Spanish, Dutch

SOFT SKILLS

Strong communication and presentation skills

Personable, customer and results oriented

Enjoys team work and easily shares knowledge

Target focused and strong problem-solving skills

OTHER NOTABLE ACHIEVEMENTS

-Surpassed sales objectives quarter after quarter for TD Wealth 2 consecutive years

-Successfully passed the level I exam for the CFA charter June 2017

-Co-authored IEEE published and award-winning paper "Velocity Measurement by a Vision Sensor"

CIMSA

PARAPROFESSIONAL ACTIVITIES

Running, Cycling, Cuisine, Tennis, Ski, Hockey, and Tourism.
